

Table of Contents

Introduction

Chapter 0 : Introduction

Chapter 1 : An Overall View of the Economic Approach

Chapter 2 : Sequences through Excel

Economic Approach: Optimization

Unconstrained

Single Variable

Chapter 3 : Single Variable Unconstrained Optimization Totals and Marginals with Excel

Chapter 4 : Single Variable Unconstrained Optimization Using Solver

Chapter 5 : Single Variable Unconstrained Optimization and Comparative Statics Using Calculus

Chapter 6 : Single Variable Unconstrained Optimization and Comparative Statics Using Excel

Chapter 7 : Review of Single Variable Unconstrained Optimization and Comparative Statics

Multi-Variable

Chapter 8 : Two-Variable Unconstrained Optimization and Comparative Statics Using Calculus

Chapter 9 : Two-Variable Unconstrained Optimization and Comparative Statics Using Excel

Constrained

Chapter 10 : Constrained Optimization and Comparative Statics Using Calculus

Chapter 11 : Constrained Optimization and Comparative Statics Using Excel

Chapter 12 : Review of Constrained Optimization

Economic Approach: Equilibrium

Chapter 13 : Introduction to Equilibrium

Chapter 14 : Equilibrium Profits in an Entry/Exit Model: Initial Solution and Comparative Statics with Excel

Chapter 15 : Equilibrium Profits in an Entry/Exit Model: Understanding Phase Diagrams

Chapter 16 : Equilibrium Output in a Macro Model: Initial Solution, Understanding Phase Diagrams, and Comparative Statics with Pencil and Paper

Chapter 17 : Equilibrium Output in a Macro Model: Initial Solution, Understanding Phase Diagrams, and Comparative Statics with Excel

Chapter 18 : Review of Equilibrium Models: Equilibrium Rate of Return in an Educational Choice Model

Putting Optimization and Equilibrium Together

Chapter 19 : Equilibrium Allocation in a Pollution Permits Model

Chapter 20 : Comparing Two Solutions to the Pollution Problem: Understanding the Market System

Chapter 21 : Course Review
